

Interior Design Portfolio

Meredith College
Expected Graduation Date: May 2027
Selected Work: 2023 - 2026

ABOUT ME

Hi, I'm Sydney Vo, a senior at Meredith College pursuing a Bachelor of Science in Interior Design with minors in Marketing and Studio Arts. My passion for design began early while working on creative projects with my dad, and my background in STEM shaped a mindset that bridges logical structure with creative vision. Driven by the belief that good design must be inherently accessible and inclusive, I strive to create environments that are intuitive, highly functional, and welcoming for everyone who moves through them. Through internships at Furnitureland South, Lauren Ashley Design LLC, and MM Interior Design Group, I have built a strong technical foundation in AutoCAD, SketchUp, Enscape, visual storytelling, and site coordination. Guided by a commitment to continuous learning through new digital tools, creative crafts, and refined technical skills, I am dedicated to making a meaningful, lasting difference in the profession.

RESUME

EXPERIENCE

MM Interior Design Group | May 2025 - Jul 2025

Interior Design Intern

Supported residential and commercial projects through space planning, detailed AutoCAD drafting, and 3D renderings in SketchUp and Enscape. Curated color and finish schemes, prepared client presentations, and managed daily library resources and vendor communication.

Lauren Ashley Design LLC | Aug 2025 - Dec 2025

Interior Design Intern

Collaborated on design development by producing AutoCAD plans, rendering SketchUp models, and assembling mood boards and finish options. Streamlined project workflows through digital library organization, vendor resource management, and client presentation preparation.

Furnitureland South | Jun 2025 - Jul 2025

Visual Merchandising and Design Intern

Assisted designers in researching, building, and installing interactive showroom displays from concept to completion. Conceptualized and executed a full-scale retail vignette from start to finish while presenting key insights on visual merchandising and store layout.

REWARDS & HONORS

Dean List | All Semesters

Academic Merit Scholarhsip | All Semesters

Meredith-Rumley Promise Scholarship | All Semesters

Sandra Graham Shelton Scholarship for Interior Design | All Semester

LANGUAGE PROFICIENCY

English | Native

Vietnamese | Elementary

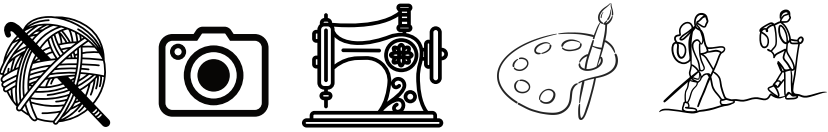

EDUCATION

Meredith College | Expected May 2027 | 3.94 GPA

Bachelor of Science in Interior Design | Minors in Marketing & Studio Arts

Meredith College Interior Design program is accredited by Council of Interior Design Accreditation (CIDA)

KENKO ケンコー

Course: ID 344 INTERIOR DESIGN III COMMERCIAL I
Year: Spring 2026
Software: AutoCAD & SketchUp

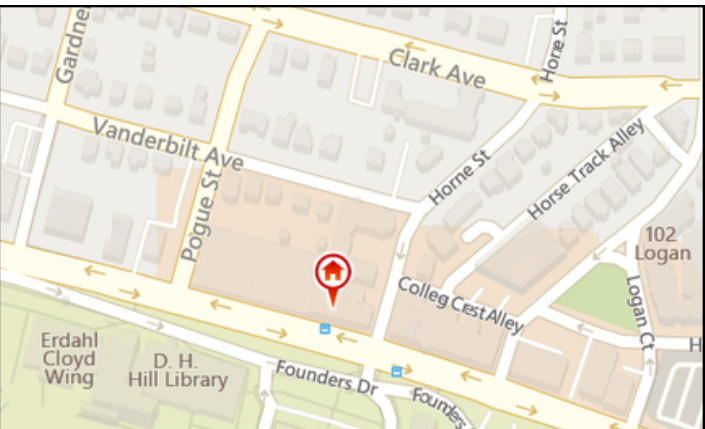

PROJECT DESCRIPTION

Situated along Raleigh’s high-density Hillsborough Street corridor directly adjacent to Target, Kenko (ケンコー) is a 5,000 sq ft commercial wellness center. Grounded in biophilic principles and organic geometry, the space balances crisp, contemporary architectural forms with warm natural wood finishes, soft curvilinear millwork, and layered ambient lighting. The layout flows seamlessly across dedicated zones including but not all: a welcoming reception desk, an integrated retail display area, a community tea bar, a private pilates studio, and full locker/restroom facilities. [Link: Kenko](#)

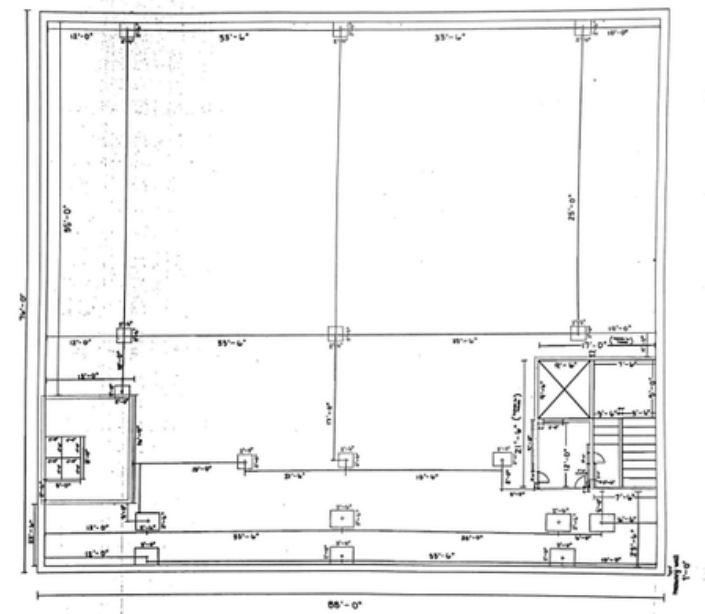

RESEARCH DRIVERS

- **Natural Daylight:** Maximizes daylight to reduce stress, elevate mood, and boost productivity.
- **Circadian Lighting:** Mimics natural light cycles to align biological rhythms and support focus.
- **Color Psychology:** Pairs calming cool tones with targeted warm accents to balance relaxation and energy.
- **Biophilic Integration:** Uses natural woods and greenery to strengthen well-being and connection to nature.

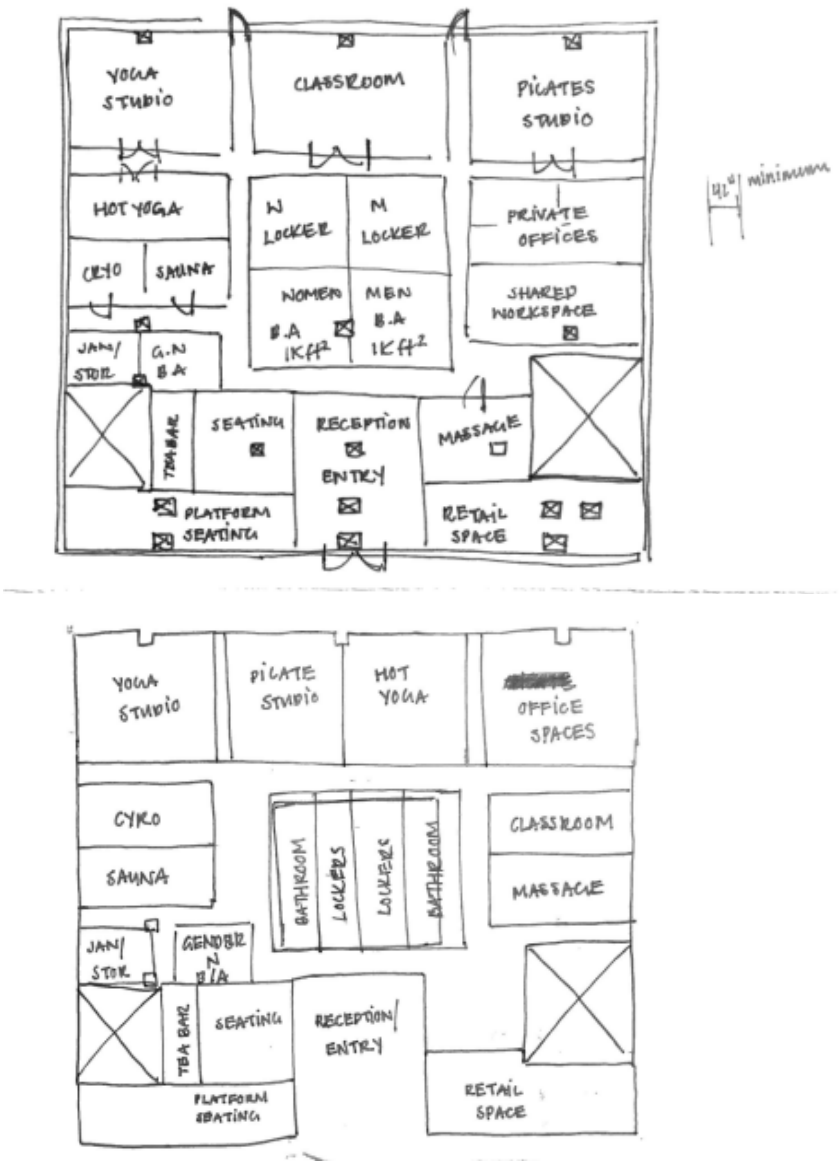

PROGRAM

Site Location:
2508 1/2 Hillsborough St, Raleigh, NC 27607

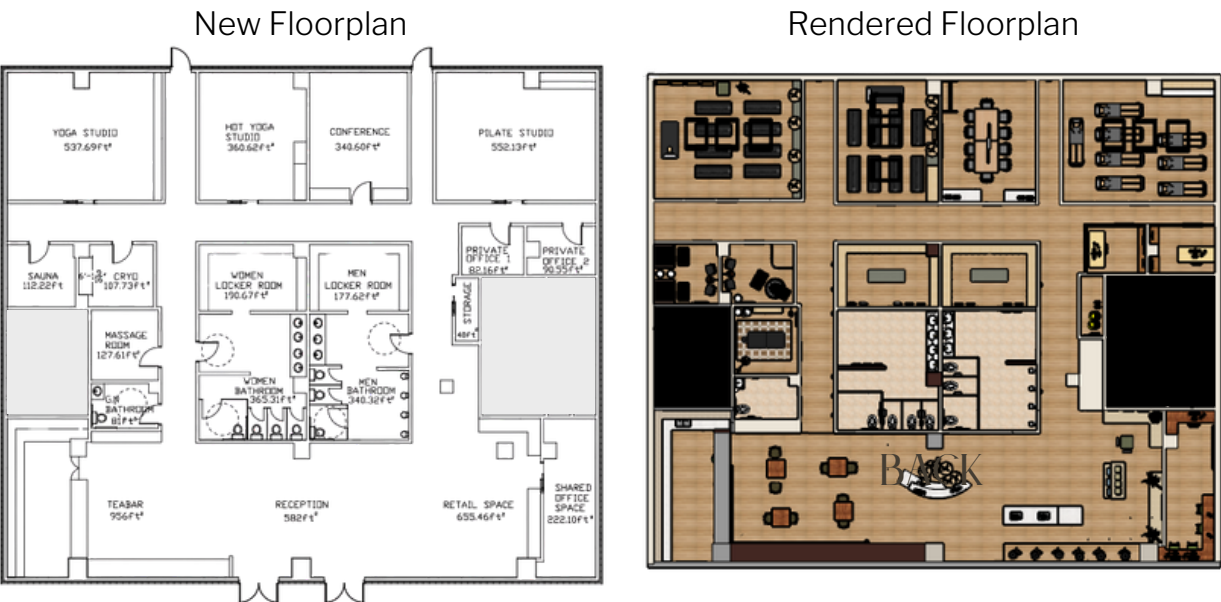

Original Floorplan - sq ft excludes existing stair & elevator shaft

Iterative Process: Explored multiple block diagram iterations to refine functional zoning, room adjacencies, and spatial circulation.

SCHEMATIC DESIGN

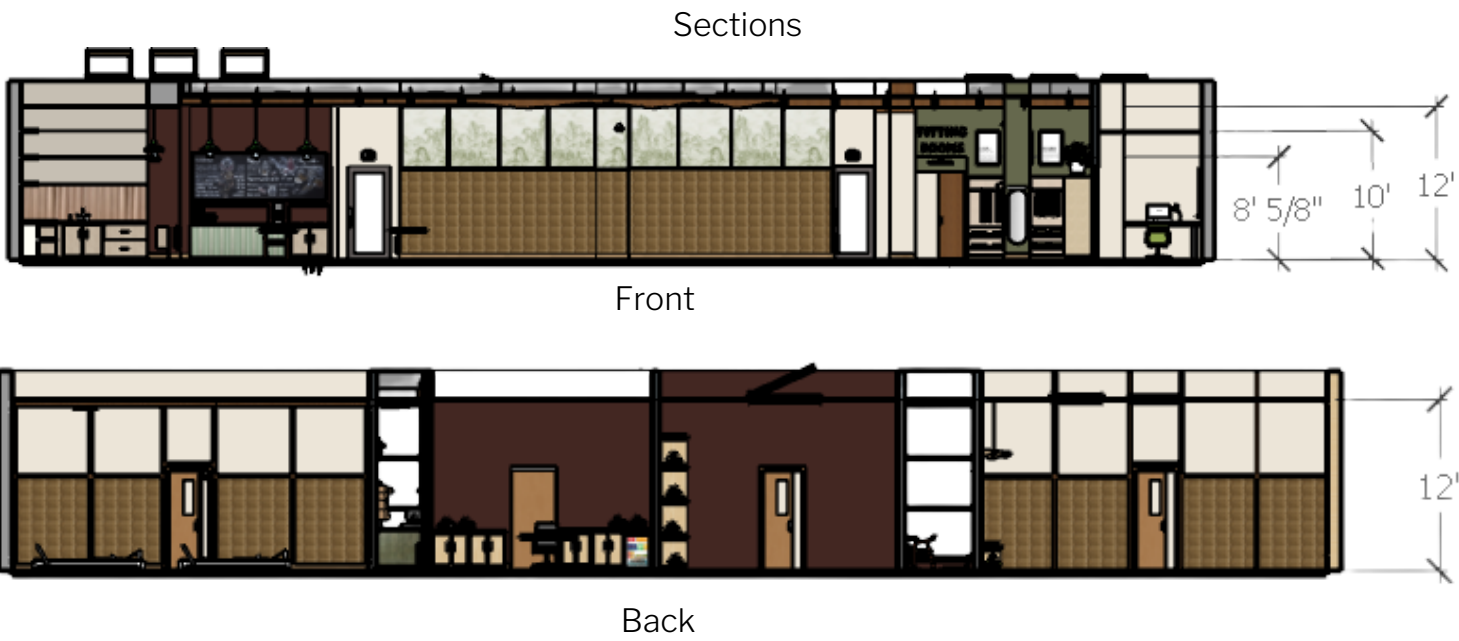

The 5,000 sq ft footprint strategically splits active and quiet zones: the public Hillsborough Street elevation hosts the reception, retail, and tea bar, while the private exercise studios and amenities transition toward the quiet rear alley facade.

CONCEPT STATEMENT

Kenko integrates daylight, natural materials, and Japanese design principles, with the traditional teahouse serving as its primary inspiration, to cultivate a serene and cohesive environment that fosters emotional and physical balance. The interplay of light and dark green tile, light wood and darker finishes, woven wallcoverings, and custom built-in casework introduces depth, contrast, and a refined sense of craftsmanship.

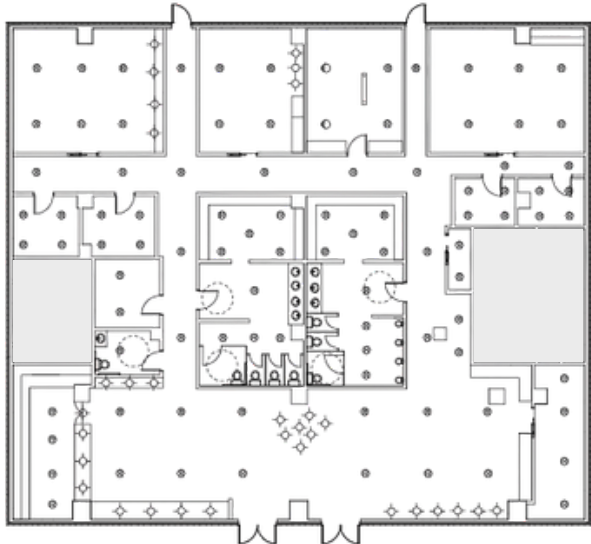

Material Selections

These sections views highlight the contrast in spatial volume across the plan. The design maintains the original 14'-0" floor-to-open-deck clearance, using intentionally dropped ceilings in select zones to enhance human scale and acoustic comfort.

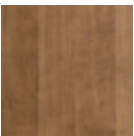

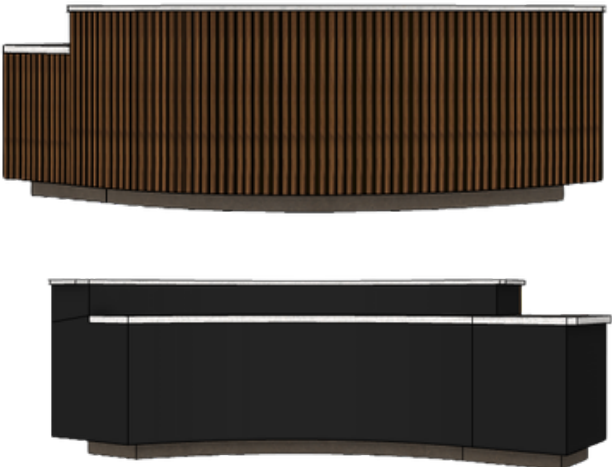

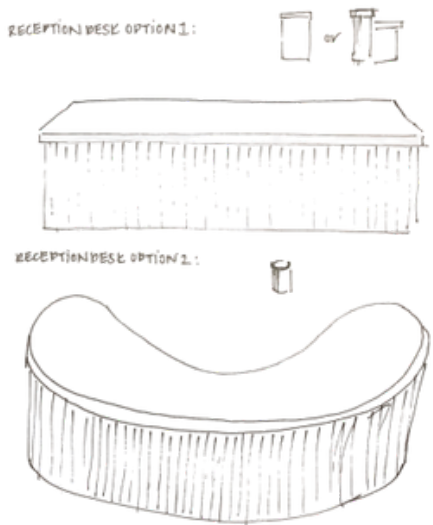

DESIGN DEVELOPMENT

Lighting Plan

Focuses on overall lighting intent and
ambiance, serving as a conceptual
guide rather than a complete
reflected ceiling plan.

Custom Millwork - Reception Desk

Back

Kenko features custom-designed millwork elements tailored,
incorporating dual counter heights, durable surface materials,
and integrated storage to meet ADA accessibility standards
without sacrificing style.

RENDERING

Software: SketchUp & Enscape

Tea Bar

Tea Bar - Platform Seating View

Inspired by traditional Japanese teahouses, this view highlights the central tea bar and raised platform seating. The combination of warm wood tones, green tile accents, and soft lighting creates an inviting, serene space for guests to gather and relax.

RENDERING

Software: SketchUp & Enscape

The reception area anchors the main entry with a custom curved desk featuring vertical wood slats and soft under-counter lighting. Integrated dual-height counters ensure full ADA accessibility, creating a warm, inclusive, and welcoming arrival experience for every guest.

RENDERING

Software: SketchUp & Enscape

The bathroom quiet extension of the facility's wellness aesthetic, this space combines fluted wall tile, rich earth tones, and integrated vessel sink vanities with soft, indirect lighting.

MEREDITH CAD LAB

Course: ID 342 SPECIAL PROBLEMS IN CADD
Year: Fall 2025
Team: Hailey Martin
Software: Revit & Enscape

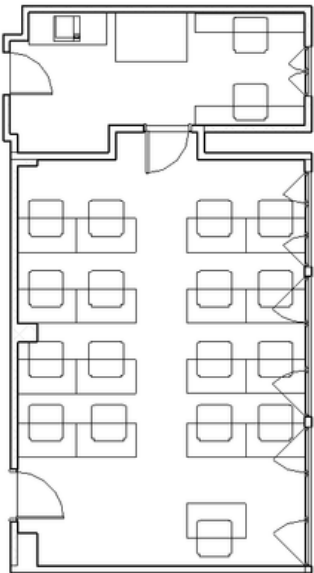

PROJECT DESCRIPTION

As part of Meredith Makeover, the Meredith CAD Lab redesign transforms an outdated higher education computer lab into a flexible, user-centered studio. In this collaborative project, I was responsible for the new layout design and 3D software development. The project replaces rigid traditional lab constraints with an adaptable environment engineered for peer collaboration, spatial efficiency, and long-term student wellness. [Link: Meredith College CAD Lab](#)

RESEARCH DRIVERS

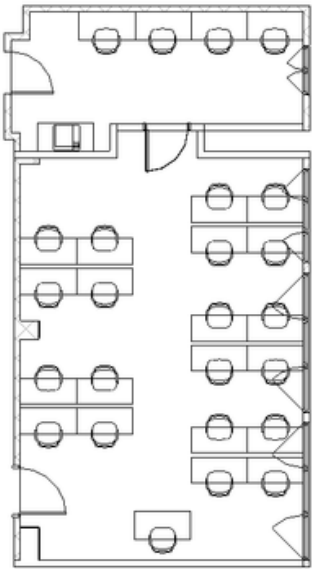

- **Circulation & Power:** 4-student collaborative pods aligned to interior power walls, eliminating spatial bottlenecks without electrical rewiring.
- **Ergonomics & Comfort:** Height-adjustable desks and mounted monitor arms to relieve physical strain and foster face-to-face teamwork.
- **Acoustics & ESD Safety:** Static Control SDT tile flooring and acoustic ceiling panels to prevent hardware damage and balance room sound.

Collaborative Workstation Pods

4-student desk clusters aligned with natural light and wall-integrated power routing to enable active group work.

Overflow Lab Room

Dedicated adjoining space providing flexible seating for individual focus and additional student capacity.

Instructor & Presentation Zone

Front focal wall featuring integrated AV projection, brand-aligned accent finishes, and unobstructed sightlines from all workstations.

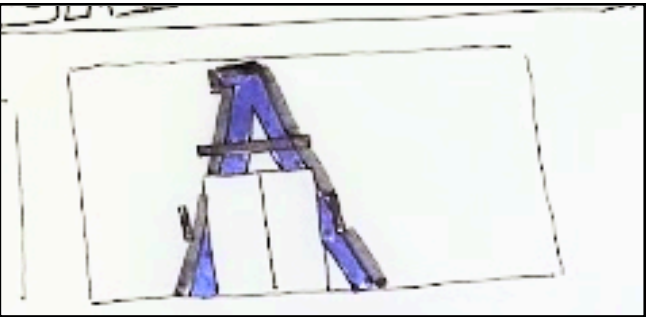

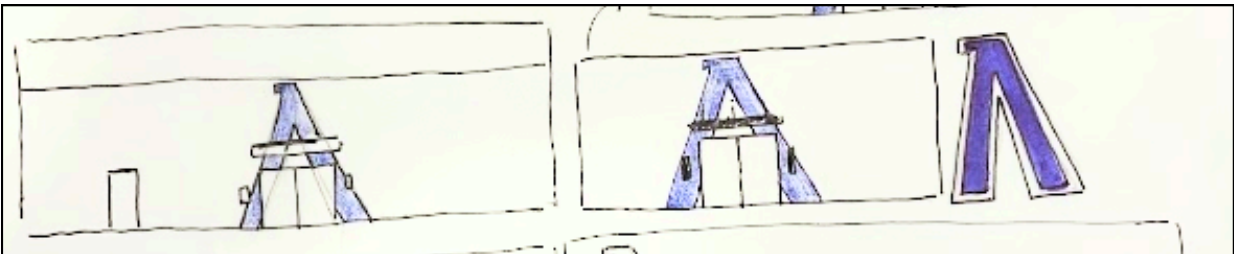

COMMERCIAL MURAL

MM Interior Design Group - Interior Design Internship
Year: Summer 2026
Software: Hand Sketches & SketchUp

PROJECT DESCRIPTION

Developed conceptual exterior mural options for an 80,000 sq. ft. commercial warehouse to enhance building presence and reflect corporate brand identity. Conducted an on-site spatial analysis to evaluate scale, viewing angles, and architectural context, translating brand values into large-scale environmental graphics through hand sketching and 3D visualization.

SCHEMATIC DESIGN

Initial conceptual hand sketches exploring composition, scale, and brand-aligned graphic forms during schematic design to evaluate visual rhythm and impact across the warehouse façade.

DESIGN DEVELOPMENT

Translated schematic concepts into digital models to evaluate true scale, proportion, and visual impact on the building envelope.

OPTION 1:
SINGLE 'A' MURAL

OPTION 2:
SINGLE 'A' MURAL WITH
BLACK OUTLINE

IMPLEMENTATION

Final physical installation on the building envelope, bringing the conceptual design to life at full architectural scale.

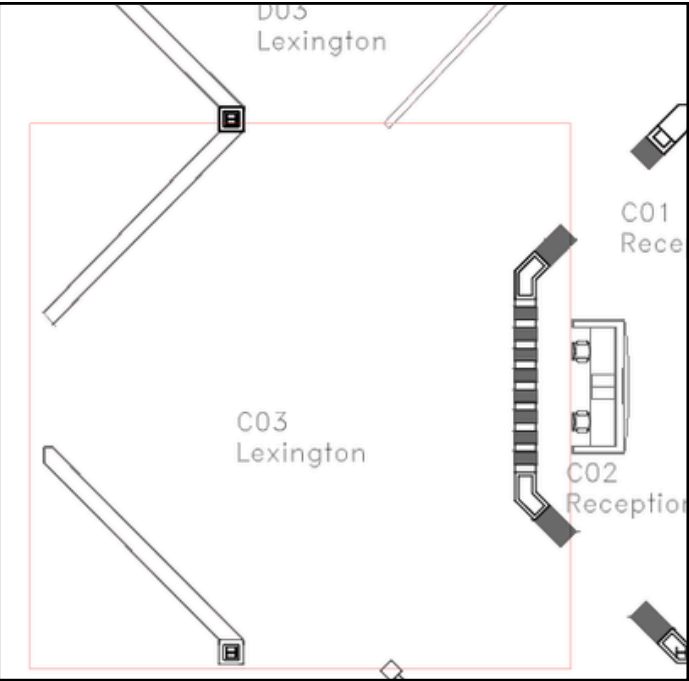

ZANZIBAR

Furnitureland South - Visual Merchandising and Design Internship
Year: Summer 2025
Software: AutoCad & SketchUp

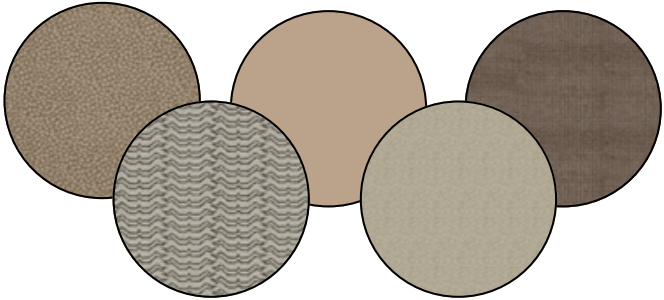

PROJECT DESCRIPTION

Designed a custom retail environment for Furnitureland South showcasing Lexington’s Zanzibar collection, guiding the project full-cycle from initial programming through final design. Drafted precision furniture layouts in AutoCAD and generated 3D visualizations using SketchUp. Authored a comprehensive client proposal encompassing paint schemes, accessory styling, and cost estimates to secure project approval.

PROGRAM

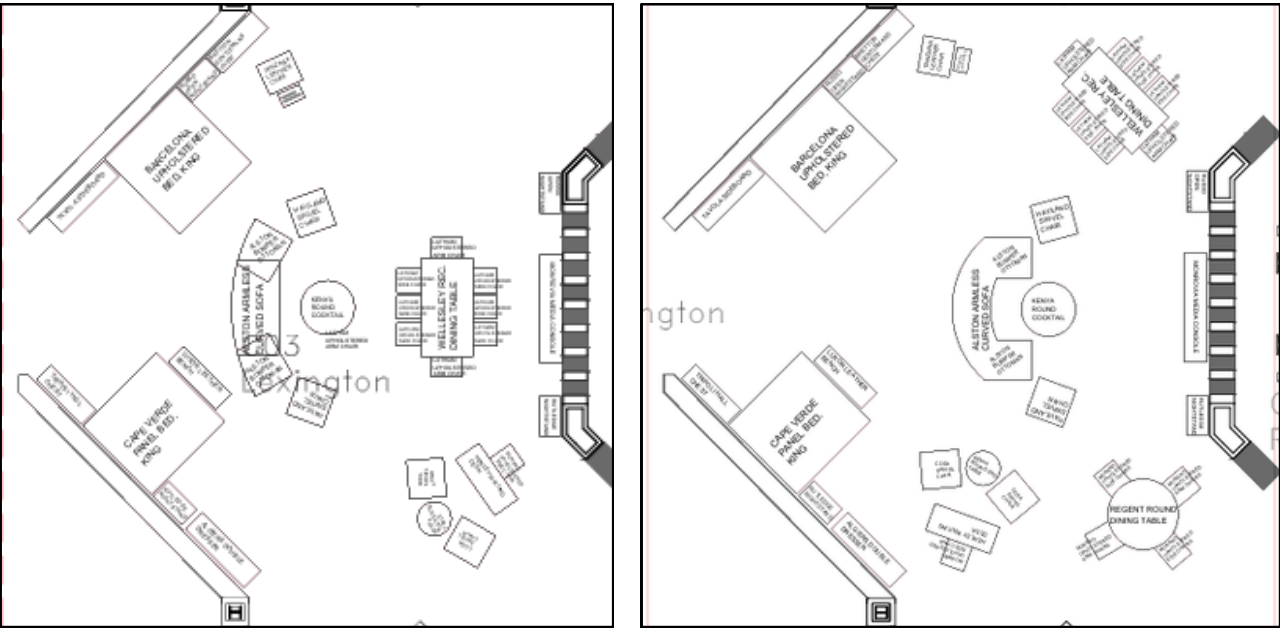

Evaluated spatial boundaries, architectural sightlines, and display capacity for the retail floor directly behind Furnitureland South's main reception desk, establishing the foundational floor plan for the Zanzibar collection.

Fabric swatches for provided furniture

SCHEMATIC DESIGN

Schematic AutoCAD layouts establishing spatial flow, furniture placement, and visual hierarchy for the Zanzibar collection display.

Selected Sherwin-William paint finishes to complement furniture finishes and elevate visual contrast

DESIGN DEVELOPMENT

Software: SketchUp

Generated 3D SketchUp models to visualize alternative merchandising strategies within existing architectural constraints. These conceptual renderings demonstrated how the existing Zanzibar collection could be re-envisioned and optimized for the reception showroom space without executing a physical buildout.

DESIGN DEVELOPMENT

Software: Canva

Developed itemized accessory boards featuring vendor specifications, pricing, and budget breakdowns to illustrate visual styling and secure financial approval for the project.

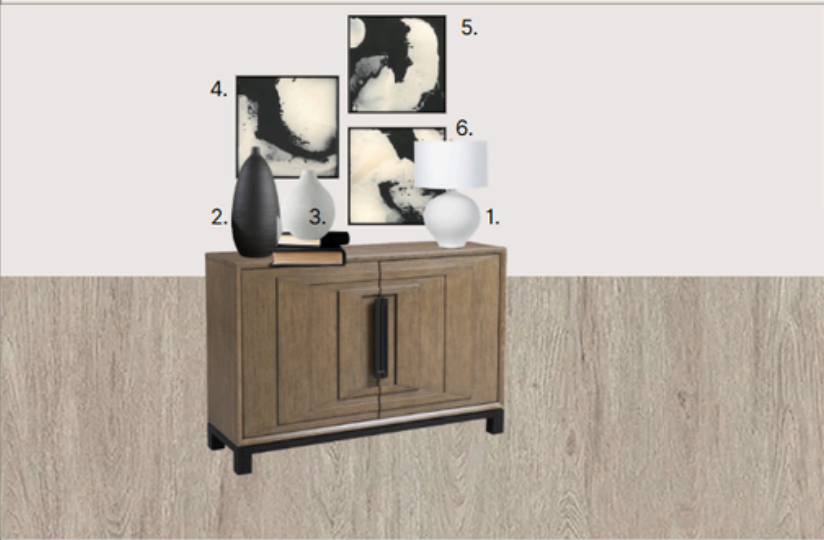

ACCESSORY SELECTION

1. Four Hands - 224742-004 - Kelita Table Lamp - (Q2) = \$377.16
2. Four Hands - 20-1420 - Grant Bookends = \$116.00
3. Uttermost - 18244 - Echo Ridge Vases S/2 = \$101.01
4. Uttermost - R04213 - Altana Metal Wall Decor S/3 - (Q3) = \$645.00
5. Classic Home - SKUV290145 - King Size, Cloud - Rowen Collection = \$274.10
6. Classic Home - SKUV290147 - King Size, Cloud - Rowen Sham - (Q2) = \$89.20
7. Classic Home - SKUV180035 - Black - SLD Leather - (14' x 26") - (Q2) = \$97.80
** Books will be sourced from FFA

CAPE VERDE

ACCESSORY SELECTION

1. Regina Andrew - 13-1625 - Arlo Ceramic Table Lamp = \$216.00
2. Uttermost - 18277 - Bower Vases S/2 = \$179.00 (Product Release 9/04)
3. Uttermost - 18072 - Apothecary Vases, S/3 = \$157.00
4. Leftbank Art - 52GCVR0213 - Overlap in Black and White XXIV = \$173.40
5. Leftbank Art - 52GCVR0200 - Overlap in Black and White XI = \$173.40
6. Leftbank Art - 52GCVR0215 - Overlap in Black and White XXVI = \$173.40
** Books will be sourced from FFA

SEARS MODERN HOME

Course: ID 244 INTERIOR DESIGN II
Year: Fall 2024
Software: Hand Sketches & SketchUp

PROJECT DESCRIPTION

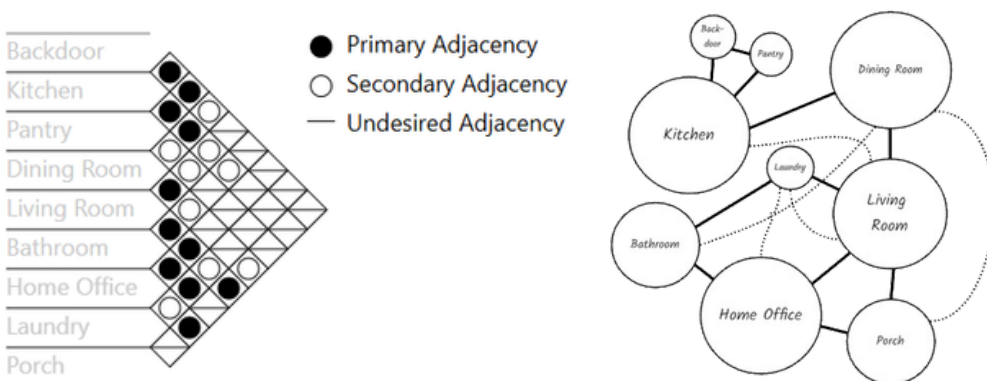

This project focuses on the historic preservation and spatial revitalization of the Sears Modern Home Solace Model No. 3218, translating an early 20th-century kit home into a functional, contemporary residential layout. The design concept was developed through hand sketching, physical scale foam-board models, SketchUp 3D modeling, Wecora material boards, and Canva
